## DESCRIPTION

Our Zima Training Hat is designed to fit under a helmet while protecting from the cold during winter training. Trentino™ fabric keeps you warm and comfortable.

## MATERIALS

### **Tek-Race™ Fabric**

A mid-weight brushed back wind and water-proof material that utilizes a Tekseries membrane for protection.

### **Trentino Imprint™ Fabric**

A medium weight brushed back stretch material with Aqua Zero water repellent treatment.

## FIT DETAILS

### **One Size Fits Most**

Includes elastic to fit most people.

## FEATURES + TECHNOLOGIES

### **Tagless Labeling**

A smooth surface, sublimated labels that will not irritate your skin.

### **Vibrant Unlimited Colors**

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

## DESCRIPTION

Our versatile Defend Winter Hat features a top drawstring closure to allow moisture and temperature control as a hat or to be opened and used as an extreme weather neck warmer. Wind and waterproof three-layer membrane Tek-Race™ fabric will keep you warm and dry during winter training efforts.

## MATERIALS

### Defend Imprint™ Fabric

A wind and water-proof material that is body contouring and accepts sublimation printing.

### Performer Power Lycra™ Fabric

A dependable and durable, flat surface 4-way stretch material made from a nylon - LYCRA blend.

### Trentino Fixed™ Fabric

A 4-way stretch brushed back material that provides great insulation while being shape-proof; made from LYCRA fibers.

## FEATURES + TECHNOLOGIES

### Tagless Labeling

A smooth surface, sublimated labels that will not irritate your skin.

### Vibrant Unlimited Colors

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

### One Size Fits Most

Includes elastic to fit most people.

## DESCRIPTION

Retro style, warmth, and protection are what you can expect from this classic style winter cycling cap. Insulated panels throughout and the addition of a wind and waterproof front panel to take the edge off on those cold winter days.

## MATERIALS

### **Element™ Fabric**

An insulated body contouring material that is forgiving and has excellent moisture transport.

## FIT DETAILS

### **One Size Fits Most**

Includes elastic to fit most people.

## FEATURES + TECHNOLOGIES

### **Tagless Labeling**

A smooth surface, sublimated labels that will not irritate your skin.

### **Vibrant Unlimited Colors**

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

### **Full Print**

An all-over printing method that allows you to customize your entire garment.

## DESCRIPTION

We construct our winter Face Mask from Element™ Fabric which is a soft, insulating material without being bulky. That means you can comfortably fit this mask under your helmet on cold days.

## MATERIALS

### Tuba™ Fabric

A circular knit material made from soft and supple micro-polyester fibers.

## FIT DETAILS

### One Size Fits Most

Includes elastic to fit most people.

## FEATURES + TECHNOLOGIES

### Tagless Labeling

A smooth surface, sublimated labels that will not irritate your skin.

### Full Print

An all-over printing method that allows you to customize your entire garment.

### Vibrant Unlimited Colors

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

## DESCRIPTION

A tubular neck warmer which is soft, comfortable and designed to be extremely breathable while providing a layer of warmth.

## MATERIALS

## DESCRIPTION

Our Defend Winter Headband is a wide model that features wind and waterproof three-layer membrane Tek-Race™ fabric that keeps you warm and dry during winter training efforts.

## MATERIALS

### **Ti. Trentino Imprint™ Fabric**

A medium weight brushed back stretch material with Aqua Zero water repellent treatment.

## FIT DETAILS

### **Fitted Cut**

Snug fitting and designed to contour your body.

## FEATURES + TECHNOLOGIES

### **Tagless Labeling**

A smooth surface, sublimated labels that will not irritate your skin.

### **Articulated**

A purposefully prepared pattern to accommodate freedom of joint movement.

### **Vibrant Unlimited Colors**

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

### **Control Double Elastic**

A soft micro-fiber elastic tape with silicone gripper on both sides to help ensure your warmer stays in place.

## DESCRIPTION

The Men's Zima cycling arm warmers use Trentino™ fabric with Aqua Zero water repellent treatment giving you the warmth you need while our pattern allows for excellent freedom of movement. A soft and supple gripper will help keep the warmers snugly in place around your upper bicep. This arm warmer compliments all of our short sleeve jerseys perfectly.

## MATERIALS

### Ti. Trentino Imprint™ Fabric

A medium weight brushed back stretch material with Aqua Zero water repellent treatment.

## FIT DETAILS

### Bottom Cut

Tight fitting and designed to be like a second skin.

## FEATURES + TECHNOLOGIES

### Articulated

A purposefully prepared pattern to accommodate freedom of joint movement.

### Locking Ankle Zipper

A special zipper with a puller that securely locks in place to keep from opening.

### Tagless Labeling

A smooth surface, sublimated labels that will not irritate your skin.

### Vibrant Unlimited Colors

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

### Control Double Elastic

A soft micro-fiber elastic tape with silicone gripper on both sides to help ensure your warmer stays in place.

## DESCRIPTION

The Men's Zima cycling leg warmers were redesigned for this years collection making them both anatomical and comfortable due to the elimination of seams on all pressure points. Made from Trentino™ fabric with Aqua Zero water repellent treatment giving you the warmth you need while our contoured pattern allows for excellent freedom of movement. A soft and supple gripper keeps the warmers snugly in place on your upper leg while we added a large locking zipper on the outside to avoid irritation on your Achilles tendon.

## MATERIALS

### **Ti.** Trentino Imprint™ Fabric

A medium weight brushed back stretch material with Aqua Zero water repellent treatment.

## FIT DETAILS

### Bottom Cut

Tight fitting and designed to be like a second skin.

## FEATURES + TECHNOLOGIES

### Tagless Labeling

A smooth surface, sublimated labels that will not irritate your skin.

### Silicon Gripper

A micro-fiber elastic with silicone added to help keep your garment in place.

### Articulated

A purposefully prepared pattern to accommodate freedom of joint movement.

### Vibrant Unlimited Colors

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

### Control Double Elastic

A soft micro-fiber elastic tape with silicone gripper on both sides to help ensure your warmer stays in place.

## DESCRIPTION

The Men's Zima cycling knee warmers use Trentino™ fabric with Aqua Zero water repellent treatment giving you the warmth you need while our contoured pattern allows for excellent freedom of movement. A soft and supple gripper keeps the warmers snugly in place on your upper leg while a silicone gripper is used to keep the bottom comfortably below your knee. A great way to add warmth to your ride without overheating.

## MATERIALS

### Defend Imprint™ Fabric

A wind and water-proof material that is body contouring and accepts sublimation printing.

## FIT DETAILS

### Fitted Cut

Snug fitting and designed to contour your body.

## FEATURES + TECHNOLOGIES

### Vibrant Unlimited Colors

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

### Silicon Gripper

A micro-fiber elastic with silicone added to help keep your garment in place.

### Articulated

A purposefully prepared pattern to accommodate freedom of joint movement.

### Tagless Labeling

A smooth surface, sublimated labels that will not irritate your skin.

### Control Double Elastic

A soft micro-fiber elastic tape with silicone gripper on both sides to help ensure your warmer stays in place.

## DESCRIPTION

The Men's Defend cycling arm warmers are windproof, waterproof, functional and comfortable all at the same time due to the use of Defend Race™ fabric. A soft and supple gripper will help keep the warmers snugly in place around your upper bicep while our pattern allows for excellent freedom of movement. This arm warmer compliments all of our short sleeve jerseys but pair perfectly with our Defend short sleeve jersey.

## MATERIALS

### **Defend Imprint™ Fabric**

A wind and water-proof material that is body contouring and accepts sublimation printing.

## FIT DETAILS

### **Bottom Cut**

Tight fitting and designed to be like a second skin.

## FEATURES + TECHNOLOGIES

### **Articulated**

A purposefully prepared pattern to accommodate freedom of joint movement.

### **Locking Ankle Zipper**

A special zipper with a puller that securely locks in place to keep from opening.

### **Tagless Labeling**

A smooth surface, sublimated labels that will not irritate your skin.

### **Vibrant Unlimited Colors**

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

### **Control Double Elastic**

A soft micro-fiber elastic tape with silicone gripper on both sides to help ensure your warmer stays in place.

## DESCRIPTION

We redesigned the Men's Defend cycling leg warmers for this years collection making them both anatomical and comfortable due to the elimination of seams on any pressure points. Made from Defend Race™ fabric which is windproof, waterproof, functional and comfortable which previously has been unachievable in a material. A soft and supple gripper keeps the warmers snugly in place on your upper leg while we added a large locking zipper on the outside to avoid irritation on your Achilles tendon. While this leg warmer pairs with all of our shorts it especially works well when used together with our Defend bib shorts.

## MATERIALS

### **Defend Imprint™ Fabric**

A wind and water-proof material that is body contouring and accepts sublimation printing.

## FIT DETAILS

### **Bottom Cut**

Tight fitting and designed to be like a second skin.

## FEATURES + TECHNOLOGIES

### **Tagless Labeling**

A smooth surface, sublimated labels that will not irritate your skin.

## MATERIALS

### ⚡ Lightning™ Fabric

An airflow technology material with 4-way stretch designed to reduce aerodynamic drag.

## FIT DETAILS

### One Size Fits Most

Includes elastic to fit most people.

## FEATURES + TECHNOLOGIES

### 🏷️ Tagless Labeling

A smooth surface, sublimated labels that will not irritate your skin.

### 🔒 Locking Zipper

A special zipper with a puller that securely locks in place to keep from opening.

### Vibrant Unlimited Colors

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

### Traditional Stitching

A durable and proven four-needle overlock serge stitching.

## DESCRIPTION

Our Go Fast Shoe Covers help with crucial aerodynamics by using Lightning™ fabric with airflow technology. Designed specifically for time trials but regularly used by road riders looking for that little extra edge.

## MATERIALS

### Lot™ Fabric

An opaque 4-way stretch material made from specially engineered fibers designed to deepen sublimated colors.

### Vivid™ Fabric

A light-weight 4-way stretch mesh material made from wicking fibers.

## FEATURES + TECHNOLOGIES

### Tagless Labeling

A smooth surface, sublimated labels that will not irritate your skin.

### Vibrant Unlimited Colors

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

## DESCRIPTION

We construct our compression style Sports Bra with minimal seams and include large armhole openings for comfort in the various riding positions you will encounter. Our Sports Bra uses wicking fabric along with a soft, protective elastic chest band.

## MATERIALS

### Mission™ Fabric

A rugged and abrasion resistant material with a flat surface that is supple.

## FEATURES + TECHNOLOGIES

### Full Print

An all-over printing method that allows you to customize your entire garment.

### Vibrant Unlimited Colors

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

## DESCRIPTION

Perfect for race hand-ups or just a cool place to store and organize your cycling accessories. Our cycling Musette bag includes a button closure for easy opening and access.

## MATERIALS

### Mission™ Fabric

A rugged and abrasion resistant material with a flat surface that is supple.

## FEATURES + TECHNOLOGIES

### Full Print

An all-over printing method that allows you to customize your entire garment.

### Vibrant Unlimited Colors

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

## DESCRIPTION

Our Deluxe Musette Bag is not your standard throwaway feed bag. It's packed full of features including an adjustable length strap, zippered compartments, and second storage area that will help keep your race day bag well organized.

## MATERIALS

### Trafo™ Fabric

A light-weight and durable structured surface material made from wicking fibers.

## FEATURES + TECHNOLOGIES

### Full Print

An all-over printing method that allows you to customize your entire garment.

### Vibrant Unlimited Colors

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

## DESCRIPTION

Our Garment Bag is designed to protect your high-end Verge Sport products from abrasive materials during storage and laundering.

**VERGE**  
SPORT

# Wash Bag

## MATERIALS

### Mission™ Fabric

A rugged and abrasion resistant material with a flat surface that is supple.

## DESCRIPTION

Perfect for teams that do race laundry together or just a convenient way to keep your cycling specific garments separate from your normal wash.

**VERGESPORT.COM**

Premium custom clothing

## SOCKS KNITTED

## DESCRIPTION

Classic knitted cycling socks offered in three different heights and available in plenty of colors. Allow us to custom knit your logos and designs into the socks for a full custom option.

## SOCKS WOOL KNITTED

## DESCRIPTION

We produce our Wool cycling socks predominantly from natural fiber which will help keep your feet warm on chilly rides. Available in black with plenty of logo colors for a full custom look.

## MATERIALS

### COOLMAX™ CoolMax™ Yarn

A specially-engineered polyester fiber which improves moisture transport and breathability.

## FEATURES + TECHNOLOGIES

### Tagless Labeling

A smooth surface, sublimated labels that will not irritate your skin.

### Vibrant Unlimited Colors

Industry-leading digital printing technology that guarantees consistent, vibrant colors that last.

## DESCRIPTION

This traditional cycling sock is made from Coolmax® yarns and has a fully customizable cuff via sublimation printing which allows for designs not typically possible with a traditional knit sock. It's soft, comfortable and moisture wicking which allows it to perform best on warm to hot days.
